The hotel has submitted an application in hope of becoming the first batch of green-certified hotels. The activity is designed by the China National Tourism Administration to implement the three concepts of "Green Olympics", "Hi-tech Olympics" and "People's Olympics" and to realize the theme of "New Beijing, Great Olympics". A "Green Hotel" must be energy-efficient and environmental-friendly. It has to put priorities on energy and resources saving, food safety and hygiene etc. in order to meet the standard of the regulations. The measures include the reduction in resources by replenishing one-off amenities like toothbrush, comb and soap etc. as well as changing bed linen and towel at the demand of guests. For the food safety, all materials, ingredients and seasonings must be purchased from certified suppliers to ensure the high quality of the food. The aim of the activity is to enhance the awareness for environmental protection and to incorporate the concept of sustainable development to protect the environment, conserve resources and maintain the ecological balance.
